

Nur Loqman Hakim Bin Mohd Nasir

Kuala Lumpur, Malaysia | nloqmanhn@gmail.com | 011 16057641

PROFESSIONAL SUMMARY

Enthusiastic student who deeply passionate in teaching with fostering inquiry-based learning. Skilled in integrating technology into the classroom, with experience in student teaching roles designing STEM-focused curricula and fostering a collaborative, supportive classroom community

EXPERIENCE

Homeroom Teacher

September 2025 — September 2025 Ipoh Perak

Rumah Anak Yatim Darulsalam, Ipoh Perak

- Preparing students for their entering exam to Maktab Rendah Sains Mara
- Redesigned lesson pacing using diagnostic assessments, reducing repeat-explanation time and increasing student comprehension speed within 4 weeks
- Built personalised study trackers for each student, allowing targeted intervention that visibly improved weak subject performance before exam day

Assistant Teacher

March 2025 — September 2025, Ipoh, Perak

JSP First Garden

- Raised on-time homework submission rate for assigned students by introducing a structured accountability check-in system
- Strengthened student results in Science, English, and Mathematics by identifying individual knowledge gaps and tailoring explanations accordingly
- Introduced short weekly progress quizzes that gave teachers data to intervene earlier, reducing last-minute cramming before major tests

Volunteer Teacher

April 2025 — August 2025, Ipoh, Perak

Rumah Anak Yatim Darulsalam Ipoh

- Collaborate with other students to enhance teaching quality
- Rebuilt foundational numeracy for students who were significantly behind grade level, improving their ability to attempt exam questions they previously skipped entirely
- Identified a high-potential students and provided stretch material, setting them up for stronger academic trajectories beyond the program

Volunteer Teacher

April 2025 — August 2025, Ipoh, Perak

Pertubuhan Baitul Aini Anak Anak Yatim Dan Miskin Ipoh Perak

- Delivered multi-subject instruction (Mathematics, Add Maths, English, Physics) to underserved students, bridging gaps left by inconsistent formal schooling

- Introduced peer-teaching sessions among stronger and weaker students, improving overall cohort performance while building collaborative learning habits
- Ran structured mock exams that gave students measurable feedback and reduced exam anxiety through repeated, low-stakes practice

Teacher (Part time)

February 2026 — March 2026, Ipoh, Perak

JSP First Garden

- Raised on-time homework submission rate for assigned students by introducing a structured accountability check-in system
- Introduced short weekly progress quizzes that gave teachers data to intervene earlier, reducing last-minute cramming before major tests

PROJECT

Elevate Siswa

Founder of Project and Leader

- Founded and led a volunteer tutoring initiative serving orphan students, coordinating 4 volunteers across multiple sessions to ensure consistent lesson delivery
- Designed the program curriculum and volunteer schedule from scratch, cutting lesson cancellation rate to near zero through proactive coordination
- Demonstrated that targeted academic support can meaningfully close the opportunity gap

Kitahack2026

Figma UI UX designer

- Designed an accessibility-first UI prototype enabling visually impaired users to navigate public transport independently — addressing a real gap in existing transit apps
- Applied a minimalist and clean design principles in Figma, ensuring screen-reader compatibility and high-contrast layouts without compromising visual clarity for sighted users
- Coordinated design decisions across a multi-university team, aligning diverse stakeholder inputs into a coherent and presentable prototype within the hackathon timeline

Graphic Design

Designer

- Secured and delivered commissioned design work for international clients across the UK and Germany proving ability to meet professional standards remotely without supervision
- Navigated a cross-cultural creative collaboration with a German artist, resolving differences in design direction to produce a final output both parties approved without scope creep
- Maintained 100% on-time delivery across all client projects while managing briefs, revision cycles, and final handoffs entirely independently alongside full-time studies

Borneo HackWknd

Figma UI UX designer | Front end Developer

- Designed Nudge, a mobile app that surfaces hidden BNPL (Buy Now, Pay Later) debt commitments — helping users see the true cost of deferred spending before it compounds

- Applied behavioural economics principles (loss aversion, commitment visibility) directly into the UX, making the app nudge users toward better financial decisions passively
- Contributed both UI/UX design and frontend development, shipping a functional prototype that communicated a complex financial problem through a clean, intuitive interface

EDUCATION

Bachelor of Computer Science (Artificial Intelligence) With Honor

National Defense University of Malaysia

Grade: 4.00 for semester 1 | September 2025 – present
